

Representative Dean Sanpei

APRIL 2014

"I aspire to the adage that there is no limit to what a man can achieve as long as he doesn't care who gets the credit."

Began the Investigation into the Former Attorney General

Representative Sanpei was the chief sponsor of the resolution that began the investigation into the former attorney general. As allegations surfaced into then attorney general John Swallow and it became apparent to Representative Sanpei that none of the media nor county initiated investigations were under any obligation to share their findings with the legislature and that the

legislature was the only body who carried the power of impeachment – Representative Sanpei felt it essential that a legislative investigation be conducted. It was he who sponsored the resolution that began the investigation that ultimately concluded there were multiple instances where the law had been broken, and laid the foundation for numerous campaign finance reforms.

Medicaid Reform Will Save the State \$770 Million Dollars

During Representative Sanpei's early time in office he knew that health-care cost escalation could be curbed without compromising care. He began an effort in coordination with numerous stakeholders to transform Healthcare in Utah towards more Accountable Care and population health management. The legislative fiscal analyst estimated the reforms facilitated by Representative Sanpei would save the state \$770 million over seven years increasing further over time.
