

House District 63

The Hope of America

Assuring our children have the same opportunities that we've had.

There is hope for America, but we have to be making decisions today that will assure the optimism our children have about the future is well founded in us. A good educational system, a good healthcare

model, an economy that is growing and not being funded exclusively by debt. We need to give future generations the same freedoms and opportunities that we have had - we owe them that.

THANK YOU!

You have shared your stories, concerns, hopes, and insights of where our futures need to go.

I know my family has been able to connect with people we would never have had the opportunity of finding had I not been running for office. We have a depth of wisdom, kindness, and experience very close by in our community - Thank You!

Thank you also to all the donors of time, money, yard space for signs, phone calls, and above all else - moral support! We appreciate you more than you realize.

-Dean Sanpei

WHY VOTE FOR DEAN - HEALTHCARE COSTS

My background is business and finance. I have been an executive for a \$6 billion dollar company and prioritize multiple million dollar projects on a regular basis. Last year Utah was able to put pension liabilities for the state on a long term sustainable route. The next focus will

have to be on Medicaid costs. Obama's health reform will create hundreds of millions in Utah budget shortfalls. Borrowed Federal dollars is not a long term solution. As a healthcare executive I know where government creates perverse incentives - I also know how to fix it.

WHY VOTE FOR DEAN - BUSINESS AND THE ECONOMY

Unemployment continues to rise and the government continues to spend. The Federal government is issuing bonds and purchasing its own debt using printed money. States can't print money so states like California have begun to issue IOUs - promises on paper to pay people back. In the meantime commodity prices are rising in the background as our currency gets

slowly devalued. I understand what drives the economy and how the complex interactions function. I know that like an ecosystem you can't change one area and not expect consequences. We don't need bailouts - we need a low tax base. We don't need more debt - we need fiscal discipline. We don't need platitudes - we need someone with proven business experience.

WHY VOTE FOR DEAN - STATE BUSINESS IS ALL RUN BY CAUCUS

Party stances are decided in party caucuses. Members of each caucus discuss in separate groups the pros and cons of various legislation and jointly derive a position. Strategies and votes are developed in accordance with state party platforms. Party affiliation is critical

in political life and while functioning in the legislature. As a republican I will be able to support the conservative principles that are part of the Republican platform and in turn have influence within my party and in the legislature as a whole.
